LAN Discovery Integration Guide

Permission

Mobile App

```
    <uses-permission android:name="android.permission.INTERNET" />
<uses-permission android:name="android.permission.CHANGE_NETWORK_STATE" />
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />
```

Robot App

```
N/A
```

Dependency

Mobile App

```
Implement 'com.ubtrobot.discover:discover-mobile:0.0.2-SNAPSHOT'
```

Robot App

```
Implement 'com.ubtrobot.discover:discover-robot:0.0.2-SNAPSHOT'
```

Mobile API

Discover

```
 Cancellable cancellable = DiscoverHub.getInstance().discoverLanHub(new
DiscoveredHubEmitter() {

                    @Override
```

```
                    public void onHubDiscovered(HubEnvironment hub) {
                        // Each robot is discovered, this function will be call backed, until
disconnected or time up
                        Log.i(TAG, "Discovered robot:" + hub.getHost());
                    }

                    @Override
                    public void onNetworkDisconnected() {
                        // Network disconnected
                        Log.e(TAG, "Network disconnect!");
                    }

                    @Override
                    public void onTimeup() {
                        // Time up
                        Log.i(TAG, "discover timeup");
                    }
                }, 5000 /* Duration, unit: ms */);
```

Robot API

Initiate

```
public class YourApplication extends Application {

   @Override
   public void onCreate() {
       super.onCreate();
       // Initiate
       DiscoverManager.init(getApplicationContext());
   }
}
```

Start Discover Service

```
                    ProtoClass.ProtoText robotInfo =
ProtoClass.ProtoText.newBuilder().setText("SN:12345678").build();
                DiscoverManager.startDiscoverService(robotInfo);
```
