Robot standup ---API

- class structure

```
/**
*Robot gesture enum
*/
public enum GestureType {
    /**
     * default gesture，Unknown gesture is the default gesture.
     */
    DEFAULT(0),
    /**
     * stand
     */
    STAND(1),
    /**
     * splits（The left foot is in front.）
     */
    SPLITS_LEFT(2),
    /**
     * splits（The right foot is in front.）
     */
    SPLITS_RIGHT(3),
    /**
     * sitdown
     */
    SITDOWN(4),
    /**
     * squatdown
     */
    SQUATDOWN(5),
```

```
    /**
     * kneeling
     */
    KNEELING(6),
    /**
     * lying
     */
    LYING(7),
    /**
     * lyingdown
     */
    LYINGDOWN(8),
    /**
     * with both legs apart（The left foot is in front.）
     */
    SPLITS_LEFT_1(9),
    /**
     * with both legs apart（The right foot is in front.）
     */
    SPLITS_RIGHT_2(10),
    /**
     * bend
     */
    BEND(11),
}

/**
*Robot fall type enum
*/
public enum FallClimbType{
    /**
     * start fall and climb
     */
    START_FALLCLIMB(0),
    /**
     * finish fall and climb
     */
```

```
FINISH_FALLCLIMB(1),
}
```

- java Interface

```
/**
 * synchronization get robot gesture
 *
 * @return result
 */
public RobotGestures.GestureType getRobotGesture();

/**
 * asynchronous get robot gesture
 *
 * @param result
 */
public void getRobotGestureSync(GetRobotGestureCallback response);

/**
 * Let the robot standup
 *
 * @param result
 */
public void standUp(ResponseCallback responseCallback);

/**
 * Let the robot sitdown
 *
 * @param result
 */
public void sitdown(ResponseCallback responseCallback);

/**
```

```
 * Let the robot squatdown
 *
 * @param 结果回调
 */
public void squatdown(ResponseCallback callback);

/**
 * Get robot fall climb status
 *
 * @return result
 */
public RobotGestures.FallClimbType getRobotFallStatus();

/**
 *  Subscribe the robot climbing state
 *
 * @param result
 */
public void subscribeFallClimbEvent(@NonNull FallClimbEventReceiver receiver);

/**
 * Unsubscribe the robot climbing state
 *
 * @param result
 */
public void unsubscribeFallClimbEvent(@NonNull FallClimbEventReceiver receiver);
```
