Summary

Mini mouth lamp service is a service application in Robot for managing Mini mouth lamp control. This document briefly describes these interfaces and SDK integration。

SDK

- Mouth LED Interface

```
public class MouthLedApi {
 /**
  * turn on
  */
 @Override public void turnOn() ;

 /**
  * turn off
  */
 @Override public void turnOff() ;
```

```
    /**
     * Turn on the lights and specify the color and duration
     *
     * @param color color
     * @param duration duration -1: Infinity
     */
    @Override public void startNormalModel(int color, int duration);

    /**
     * Turn on the lights and breathe
     *
     * @param color color {@link ColorInt}
     * @param breathDuration breathe duration of once
     * @param duration total duration -1: Infinity
     */
    @Override public void startBreathModel(int color, int breathDuration, int duration);

    /**
     * Turn on the lights and breathe
     *
     * @param color color
     * @param duration total duration
     */
    @Override public void startBreathModel(int color, int duration) ;

}
```
