v1.0	kevin.liu	19/03/05	v1.0 Release

Overview

- Small action interfaces provide ways to invoke Wukong's behaviors .
- Small action is a part of the scene which caches in system/scenes or /sdcard/customize/scenes. the files in /sdcard/customize/scenes you can create or replace your own products.
- sdk class SmallActionApi provide functions eg: listSmallActions,play,stop,playRandom etc.

SDK

```
 /**
  * list small actions
  * @return list of small actions
  */
public List<SmallAction> listSmallActions();

 /**
  * execute the smallAction
  * @param smallAction
  */
public void play(@NonNull final SmallAction smallAction);

 /**
  *  stop the smallAction
  * @param smallAction
  */
public void stop(@NonNull final SmallAction smallAction);

 /**
  * play small action on random
  */
public void playRandom();

 /**
  * stop the playing small action
  */
public void stopRandom();
```
